

FACETIME WITH GRANDMA:

DO WE GROW OLDER AND WISER WHEN READING FACIAL EXPRESSIONS?

DR. JENNIFER TEHAN STANLEY

Associate Professor of Psychology, University of Akron

Older adults do not read facial emotions nearly as accurately as young adults. However, that's not necessarily true when the older person is reading the emotions of someone they're familiar with. After all, there's a reason why Grandma always knew when you were lying. Join Dr. Stanley as she presents data on age-related differences in emotion perception and humor appreciation.

FRIDAY, SEPTEMBER 15 | 5:30 P.M.

REED AUDITORIUM | FREE AND OPEN TO THE PUBLIC

COLLOQUIUM SERIES IN PSYCHOLOGICAL SCIENCES & HUMAN BEHAVIOR

This Colloquium Series in Psychological Science and Human Behavior event is hosted by Penn State Behrend's B.A. and B.S. in Psychology degree programs and by the student Psychology Coalition with support from the School of Humanities and Social Sciences and the Student Activity Fee.

Penn State encourages qualified persons with disabilities to participate in its programs and activities. If you anticipate needing any type of accommodations or have questions about the physical access provided, please contact Jackie May at 814-898-6178 in advance of your participation or visit.

This publication is available in alternative media upon request.

Penn State is an equal opportunity, affirmative action employer, and is committed to providing employment opportunities to all qualified applicants without regard to race, color, religion, age, sex, sexual orientation, gender identity, national origin, disability or protected veteran status.
