Description	1) I plan to observe cardinals in one of their natural habitats, play an audio file of a Cooper\'s hawk, and observe the cardinals\' reactions to the sound of a predatory bird. 2) My goal is to learn how conspicuously colored male cardinals and drab colored female cardinals react to the sounds of a predatory bird. I intend to provide evidence for or against my hypothesis: Male cardinals will have more dramatic reactions to the call of a predatory bird because they are more easily detected by predators. 3) Playing the call of a predatory bird may cause psychological distress for small animal communities in the park. I do not intend to tag, mark, or physically alter the wildlife in any way.
